# Visualizer

© PSIORI

## CHALLENGE

As datasets become larger, with millions of rows and thousands of columns, rapid analysis is becoming ever more difficult.

Traditional analysis is complex, expensive and time-consuming. Visual analysis (Tableau, Qlik, etc.) show only a few columns of a table (dimensions) at a time.

## SOLUTION

PSIORI Visualizer reduces the complexity of your Big Data sets. Visualize and interact directly with all of your data - without assumptions, samples, subsets or approximations. Your high dimensional data will be transformed into a 3D data point cloud with industry leading Machine Learning technology.

PSIORI Visualizer converts Big Data into a shape that you can understand. It enables you to rapidly uncover information and draw conclusions in seconds, not in days.

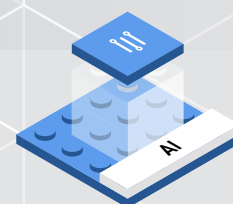

## FIRST STEPS

You can use PSIORI Visualizer with your data right now.

- Provide a data set of any size and complexity
- PSIORI trains the Machine Learning Model
- PSIORI Visualizer is provided in the cloud as a web app
- Start interacting with all of your data

PSIORI GmbH
